Summary

As a seasoned Frontend Developer with over 5+ years of experience, I specialize in creating dynamic and responsive web applications using React.js, Next.js, and JavaScript. My journey in web development has equipped me with a solid understanding of modern frontend technologies and best practices, enabling me to build efficient and scalable applications.

Skills

- Next JS | React JS | jQuery | Redux | HTML | JavaScript | TypeScript | ES6 | Framer Motion | Rest APIs
- Material UI | Shadcn UI | Tailwind CSS | bootstrap 5 | CSS
- Unit testing | Git | Jest | Cypress | GitHub

Work Experience

Front End Developer

02/2022 - Current

Capgemini India – Noida NSEZ, Uttar Pradesh

- Collaborated closely with cross-functional teams to develop and integrate RESTful APIs, ensuring seamless communication between front-end and back-end systems.
- Involved in understanding the user stories then designing and execution of test cases after that defect reporting, retesting, and preparing the Weekly status report, Client communication.
- Actively participated in Agile development methodologies, including sprint planning, daily stand-ups, and sprint reviews, fostering a collaborative and iterative development environment.
- Mentored junior developers, providing guidance on best practices, code reviews, and troubleshooting techniques to support their professional growth and development.

Front End Developer

01/2021 to 12/2022

WebAPP Future Tech – Noida 63, Uttar Pradesh

- Designed multiple dynamic and browser compatible pages using Ant UI, React-Redux.
- Developed software that processes API files and interacts with back-end databases.
- Ensured brand consistency across designs, and maintained and enhanced the company's website by adding new features and functionalities.
- Applied optimization techniques to reduce page size and load times to enhance user experience using sprites.
- Added Dynamic Functionality by creating and dispatching Action Creators that deployed Actions.

Front End Developer

04/2019 to 10/2020

Maverics Techninclusive Pvt. Ltd. – Moradabad, Uttar Pradesh

- Identified web-based user interactions and developed highly responsive user interface components via React concepts.

- Translated designs and wireframes into high-quality code and wrote application interface code via JavaScript following ReactJS workflows.
- Worked with React.js Virtual DOM and unit testing, rendering components that contained custom HTML tags.

Projects

CCPP (Essity)

- At Essity, a company specializing in hygiene products, I played a key role in developing their website by integrating APIs to display content using Umbraco CMS. I also created an admin panel featuring a data table for managing and viewing content, with a detailed list view displayed in a popup.
- Implemented "Add to Cart" functionality, allowing users to easily add hygiene products to their shopping cart.
- Integrated a coupon system, allowing users to apply discounts at checkout, enhancing their shopping experience.
- Developed a receipt scanning feature using camera integration for users to upload receipts and match validation, ensuring accurate tracking of purchases and discounts.

The Home Depot

- Led the development of key features for The Home Depot's e-commerce platform, focusing on improving user experience and site performance.
- Implemented advanced search functionality using React and Redux, improving product search speed and accuracy.
- Collaborated with UX/UI designers to revamp the product detail pages, leading to a 15% increase in user engagement.
- Utilized lazy loading and code splitting techniques to optimize page load times, significantly improving the overall performance of the site.

Insite City

- Developed a city management application designed as an easy-to-use platform that invites architects and designers to put their projects on the map (literally) and engage with the current urban landscape.
- Integrated third-party APIs to enhance functionality, including Firebase Realtime Chat for user communication and features to connect users with the best architects in the city.

SSB Games (Web Admin)

- front-end development for an admin panel focused on managing users, tickets, coins, and chat functionalities. Integrated a comprehensive ticketing system for tracking user activities and issues.
- Developed a system to automatically generate coins for every new user upon registration, enhancing user engagement.
- Developed a payment integration for course enrollment, allowing users to pay for and access courses directly through the platform.
- Created backend APIs with Express.js for incrementing and decrementing tickets and coins based on user activities in games.

Education

B.Sc. (Hons.) Computer Science

Teerthanker Mahaveer University

06/2016

Moradabad

Mater of Computer Application

IFTM University

06/2018

Moradabad
